

HYDRAULIC THUMBS

KNAPP Hydraulic Thumbs allow you to DO MORE with your excavator by working with your bucket so you can grab and pick up. The thumb is mounted to the dipper arm of your excavator so you can use the machine like a jaw against the bucket to grab items such as rocks, scrub, logs and debris.

- Multiple thumb sizes to fit with any bucket
- Stocks of common thumbs available so no waiting time
- Custom thumbs made to fit any excavator with only 4 days lead time
- Backing plate welded onto the dipper arm so thumbs can be retro-fitted to new or used excavators
- Thumb tucks away when not in use

Excavator Size	Model	Thumb Length	Standard Thumb Width	Standard Backing Plate Width	Standard Backing Plate Length
0.8 - 1.8 tonne	HT500XL	500	150	65	767
